Price of FRP Cable Trays for Communication

Overview

Learn the Frp Cable Tray Cost Per Meter GuideLearn the Frp Cable Tray Cost Per Meter. Find out what makes the price change. Get simple facts for your proje.

Key Takeaways

FRP cable trays for communication applications typically range from $1 to $5. 80 per meter, depending on type, size, and order quantity.

Pricing Overview

The cost of FRP cable trays varies significantly based on tray type, dimensions, load capacity, and order volume. For communication-specific trays (commonly 300x100mm horizontal ladder or trough types), typical pricing is: Small orders (100–999 meters): $5. 80 per meterMedium orders (1,000–7,999 meters): $3.

50 per meterLarge orders (8,000 meters+): $2. 40 per meter For very large infrastructure projects exceeding 10,000 meters, suppliers like Hebei Sinta Trading and Hengshui Hongwo offer aggressive pricing between $1 and $1. 88 per meter.

Factors Affecting Price

Tray Type and Design: Trough-type trays provide solid-bottom protection, ideal for dust-prone environments, but may be heavier and cost slightly more. Channel or perforated trays are lighter and allow better ventilation, often priced lower per unit. Material and Resin Type: FRP trays use polyester, vinyl ester, or epoxy resins, with epoxy generally costing more due to superior chemical resistance and mechanical strength.

Higher glass fiber content increases strength and stiffness, affecting price. Load Capacity: Light-duty trays: up to 50 kg/meterMedium-duty trays: 50–100 kg/meterHeavy-duty trays: above 100 kg/meter Higher load ratings typically increase cost. Order Volume and Supplier: Bulk orders often qualify for tiered discounts, reducing per-meter cost significantly.

Local suppliers may reduce logistics costs, while international suppliers may offer lower base prices but higher shipping fees. Accessories and Customization: Fittings like elbows, tees, and covers, as well as custom dimensions, can increase overall project cost.

Cost Efficiency

Although FR

P trays may have a higher initial price than galvanized steel, they offer long-term savings due to corrosion resistance, lightweight construction, reduced installation time, and minimal maintenance.

Summary

For communication applications, expect $2. 40–$5. 80 per meter for typical orders, with prices dropping to $1–$1.

88 per meter for very large projects. Selection should consider tray type, load capacity, environmental conditions, and supplier logistics to optimize both upfront and lifecycle costs.
