Price of installing surge protection distribution boxes

Overview

Whole-house surge protector installation costs between $70 and $700, with most homeowners spending around $300 for your project. The type of surge protector you select and the amperage of your electrical panel will determine your final installation total. This guide provides a concise cost. The distribution box cost encompasses not only the initial purchase price but also installation expenses, maintenance requirements, and long-term operational considerations that affect overall project budgets. This guide highlights the main cost drivers and provides clear low–average–high ranges in USD to help buyers budget effectively. The types of protection are Outlet Boxes, Outlet Strip, Power Distribution Unit (PDU), Surge Protector, Surge Protection Module, and Surge Protector for Media Lines Only. The current ranges from 150 mA to 310 A. For all other cases SPDs shall be fitted to protect against transient overvoltages, unless the owner of the installation declines such protection and wishes to accept the risk of damage to both wiring and equipment as tolerable.
