Price of Vertical Rainproof Distribution Box

Overview

304 stainless outdoor distribution box rainproof outdoor electronic. Secure personal details: We protect your privacy and keep your personal details safe.

Key Takeaways

Vertical rainproof distribution boxes typically range from €50 to €200 depending on size, material, and features.

Pricing Overview

Amazon Listing: A galvanized steel outdoor electric box measuring 400 x 500 x 200 mm with IP65 rainproof rating is available online, generally priced around €100–€150 for individual units, depending on shipping and seller options. This box features reinforced aluminum back straps, ventilated design, and removable backboard for flexible installation.

Made-in-

China Supplier: Vertical indoor/outdoor foundation boxes with dimensions like 400 x 500 x 300 mm are offered via factory direct sales. Prices vary widely based on customization, material, and order quantity, typically starting from €50–€120 per unit for standard models. Bulk orders or custom designs may increase the cost.

Cost Considerations: Distribution box prices are influenced by material (galvanized steel vs. plastic), IP rating (IP65–IP68), number of circuits, and additional features like DIN rail compatibility, UV resistance, and ventilation. Outdoor-rated, weatherproof enclosures generally carry a premium compared to indoor units.

Recommendations

For residential or small-scale outdoor use, a standard IP65 galvanized steel or plastic box in the €50–€120 range is sufficient. For industrial or high-capacity applications, consider larger enclosures with advanced features, which may cost €150–€200 or more. Always verify IP rating, material durability, and mounting options to ensure suitability for your environment.

By comparing suppliers and considering size, material, and features, you can select a vertical rainproof distribution box that balances cost and performance for your specific application.
