Price quote for butterfly-shaped optical cables

Overview

Discover our wholesale butterfly fiber optic cable with 9/125 LSZH sheath, available from $0.03 to $26.8.

Key Takeaways

Butterfly-shaped optical cables typically range from $0. 03 to $26. 80 per unit, depending on specifications, sheath material, and order quantity.

Price Range and Factors

The cost of butterfly-shaped optical cables varies widely based on several factors: Sheath Material: PVC sheaths are generally less expensive, while LSZH (Low Smoke Zero Halogen) sheaths cost more due to their safety and environmental compliance, especially in confined spaces or densely populated areas. Fiber Type and Count: Single-mode or multi-mode fibers, as well as the number of fiber ribbons, influence the price. More fibers or higher-performance fibers increase cost.

Bulk Orders: Wholesale purchases starting from 5 units can significantly reduce the per-unit price, with bulk pricing ranging from $0. 03 to $26. 80 per cable.

Application and Design: FTTH (Fiber to the Home) butterfly cables with flat, space-saving designs may cost more due to their specialized construction and aesthetic advantages.

Additional Considerations

Installation Environment: Outdoor or pipeline applications may require reinforced cables with steel or FRP strength members, UV protection, and moisture-resistant sheaths, which can increase the price. Connection Methods: Costs may also include splicing or termination methods such as fusion splicing, mechanical splicing, or pigtail splicing, which affect overall installation expenses. In summary, butterfly-shaped optical cables are available at a wide price range, and the final cost depends on material, fiber type, quantity, and installation requirements.

For precise pricing, contacting suppliers or requesting a quote based on your specific application is recommended.
