Pricing of Fiberglass Cable Trays

Overview

Costs vary based on tray material (steel, aluminum, or fiberglass), size, design (ladder or solid bottom), and installation complexity.

Key Takeaways

Fiberglass (FRP/GRP) cable trays typically range from $0. 65 to $25 per meter depending on type, size, resin system, and supplier.

General Price Ranges

Economical FR

P Cable Ladders: $0. 65 – $3 per meter for basic perforated or solid trays, suitable for light industrial or commercial use (MOQ varies from 1 to 100 meters). Standard Pultruded Fiberglass Ladders: $3 – $10 per meter, often used in chemical plants, offshore platforms, and water treatment facilities.

Heavy-

Duty or Custom FRP Trays: $10 – $25 per meter for high-load, corrosion-resistant, or fire-retardant trays with specialized resin systems (vinyl ester or epoxy). Accessories and Fittings: Horizontal elbows, tees, reducers, and splice connectors typically add $5–$15 per piece depending on size and radius.

Factors Affecting Price

Material and Resin System: Polyester resin is generally cheaper, while vinyl ester or epoxy systems are more expensive due to higher chemical and temperature resistance. Tray Type: Ladder, perforated, solid-bottom, or channel trays vary in cost; ladder trays are more expensive but support heavier cables. Dimensions: Width, depth, and length directly influence material usage and price.

Standard lengths are 3–6 meters. Load Capacity and Durability: Trays designed for high uniform loading or extreme environments cost more. Bulk Orders: Larger quantities often reduce per-meter cost by 10–40%.

Regional Factors: Shipping, labor, and local market conditions can affect final pricing.

Example Supplier Pricing

Alibaba Suppliers: $0. 65 – $15 per meter depending on type and MOQ.

M

P Husky: High-strength FRP trays with polyester or vinyl ester resin, ASTM-compliant, priced around $1–$10 per meter depending on specifications.

NHC FR

P: Customizable trays with high corrosion resistance and fire-retardant properties; pricing available upon inquiry, typically $3–$20 per meter. Spectrum7 Catalogue: PFL150 fiberglass ladder trays, 150mm height, 3–6m lengths, with elbows, tees, and risers; prices vary by resin type (FR, AS, VL).

Cost Considerations

Installation: Labor is generally lower than metal trays due to lighter weight and easier handling. Supports and Brackets: Can add 20–30% to total project cost. Covers and Fittings: Required for outdoor or corrosive environments, increasing overall cost.

Customization: Special colors, lengths, or resin systems may increase price. Fiberglass cable trays offer lightweight, corrosion-resistant, non-conductive, and fire-retardant advantages over steel or aluminum, making them cost-effective over the long term despite higher initial material costs.
