Purpose of surface-mounted electrical boxes

Overview

The purpose of surface-mounted boxes is to protect the connections of electrical cables that are used to connect switches, sockets, and other elements of electrical equipment. Thanks to them, it is possible to safely install electrical installations, ensuring adequate protection of cables and. A surface mount electrical box is a metal or plastic box that is used to house electrical components, such as switches, outlets, and dimmers. They're a practical solution for wiring needs in all kinds of settings—whether it's a commercial space or when you're retrofitting an older building. They come in many different types, each designed for a specific purpose—such as wall outlets, ceiling lights, junction connections, or outdoor installations.
