Red indicator light on the lighting distribution box

Overview

A Step-by-Step Guide to Reading Power Status via the Four-Color Lights in Civil Distribution Boxes Check the box's label first. If not, use this standard: Red: Fault/alarm. Steady = major fault (short circuit/overload); blinking = minor (loose connection). Circuit breakers are safety devices in a home's electrical system that protect the wiring from damage caused by excess current. These indicator lights follow modern electrical rules and. AD16 Series LED Indicators are applied high-bright LED chips as the light source with long service life, low energy consumption, and lightweight. When this light turns red, it is an unequivocal indication that the breaker has executed its primary. Green indicator window (OK): If you see a green indicator window, it means the surge protector is working normally and protecting your equipment from power surges.
