Revitapi cable tray material

Overview

Currently in Revit, there is no material parameter in the cable tray type properties dialog. The CableTray type exposes the following members. Retrieves a box that circumscribes all geometry of the element. Use the Object Styles command to set. To solve this, we need to generate materials based on the Service Type, then apply them via the IfcSingleMaterialOverride parameter. This means the parameter applied. We can apply cable tray material in MANAGE>OBJECT STYLES>CABLE TRAY & CABLE TRAY FITTING (For all types). Just like as Ducting/Piping systems, Because once. ConduitMaterial is a plugin for Revit MEP, this tool facilitates the modification of the material in Conduits and Cable Trays, allowing the modification of material of each element as configured in the type properties in the configured parameter 'Material'. When I try to script a circuit from SW1–>1, it builds like.
