S7700 with optical module

Overview

A high-performance 10G SFP+ transceiver designed for Huawei S7700 series switches, enabling reliable 40km data transmission over single-mode fiber. Key features include low power consumption, 1310nm wavelength operation, and compatibility with industry standards for seamless. If an optical module on an interface is faulty, you can run the display commands to view information about the optical module. Identify a Huawei-Certified Optical Module Run the display transceiver [interfaceinterface-typeinterface-number | slotslot-id] [verbose] command to view information. This document is intended for network engineers responsible for network design and deployment. You should understand your network well, including the network topology and service requirements. Symbol Conventions The symbols that may be found in this document are defined as follows. But it is not recommended to use non-Huawei-certified optical modules.

Huawei SFP-10G-BXD1 S7700 Optical Transceiver Module

A high-performance 10G SFP+ transceiver designed for Huawei S7700 series switches, enabling reliable 40km data transmission over single-mode fiber. Key features include low power

S7700 Series S7703/S7706/S7712 02310KVV LE2MGSC40DE0

The S7700 can function either as an aggregation or core node on a campus network or in a data center to provide integrated wireless access. The S7700 also offers voice, video, and data services, helping

Does the Huawei S2700/3700/5700/6700/7700 Support the Optical

Introduce a fact: The Huawei S2700/3700/5700/6700/7700 support the Optical Modules of other vendors, learn more about Huawei S2700/3700/5700/6700/7700 Series Switches.

S7700 Series Smart Routing Switches

The S7700 can use service ports as cluster ports, so that cluster members can be connected through optical fibers. This substantially expands the clustering distance.

Huawei SFP-10G-BXD1 S7700 Optical Transceiver Module

High-performance 10 Gigabit SFP+ bidirectional optical transceiver designed for Huawei S7700 series switches. Features single-fiber bidirectional transmission using 1330nm/1270nm wavelengths,

S7700 Series S7703/S7706/S7712 02310LLE DWDM-SFPGE-1560

S7700 Series S7703/S7706/S7712 02310LLE DWDM-SFPGE-1560-61 DWDM Optical Module ESFP-2.5G SM (1560.61nm,120km,LC)

Displaying Optical Module Information

The optical module design does not comply with the EMC, its anti-electromagnetic interference capability is low, and the optical module brings electromagnetic interference to surrounding devices.
