Small distribution box circuit breaker copper busbar

Overview

High-quality copper U-type busbar for distribution boxes, featuring MCB connector pins and combing design for reliable 3-phase busbar connections in circuit breaker systems. Electrical busbars come in various forms such as solid bars, flat strips, or insulated combs. A circuit breaker copper busbar is a critical component in electrical power distribution systems, serving as a conductive bridge that connects circuit breakers, transformers, switches, and other power equipment. Located in Wenzhou, is a professional manufacturer of low voltage fuse switch disconnector, busbar system and high & low voltage distribution wiring managements products, such as MCB pan assembly, MCCB pan assembly. Easy installation: modular design, easy to install on the DIN standard guide rail in the distribution box, bistable locking clip.
