Small Square Large Round Tail Fiber

Overview

FC-FC Type: Commonly known as circular to circular tail fiber, typically used for jumpers between ODF racks. Widely used in early SBS and Optix devices. SC-SC Type: Known as square to. Fiber optic pigtails play a central role in fiber optic cabling and, in combination with professional splicing technology, ensure maximum efficiency and low attenuation losses. Whether you need fiber optic pigtails for LC, SC or E2000 connections - we have exactly the right products for you. By combining factory-installed connectors with spliced bare fiber, pigtails ensure that network installers can create. Use Fiber pigtails when you splice. Two main types: Jacket options: For a 144-port ODF, use 12-fiber LC UPC bunch pigtails. A labeled cable saves 30 minutes of tracing.
