Standard for Integrated AC Power Supply Systems

Overview

This document gives guidelines to support the application of the ISO 81346 and IEC 81346 series to power supply systems. It also specifies best practice for its use and implementation depending on the user and situation. The American National Standards Institute (ANSI), the Institute of Electrical and Electronics Engineers (IEEE), and the International Electrotechnical Commission (IEC) are the main groups that create these standards. The application of this document supports harmonization within and between the. This IOGP Specification was prepared by a Joint Industry Programme 33 Standardization of Equipment Specifications for Procurement organized by IOGP with support by the World Economic Forum (WEF). More efficient transmission and distribution of electricity will also reduce carbon emissions.
