Suriname Bridge Size

Overview

Jules Wijdenbosch Bridge The bridge is part of the East-West Link, and is named after former president Jules Wijdenbosch. Constructed by Dutch constructor.

Key Takeaways

The Suriname Bridge (Jules Wijdenbosch Bridge) is 1,504 meters long and 52 meters high. The Jules Wijdenbosch Bridge, commonly referred to as the Suriname Bridge or locally as Bosje Brug, spans the Suriname River, connecting Paramaribo with Meerzorg in the Commewijne District. It is a cable-stayed road bridge with two lanes for vehicular traffic and does not accommodate pedestrians.

Dimensions and Structure

Total Length: 1,504 meters (approximately 1. 5 kilometers)Height Above Water: 52 meters, allowing river traffic to pass underneath Main Span: Exceeds 150 meters, characteristic of cable-stayed bridge design Lanes: 2 lanes for vehiclesConstruction and PurposeConstructed by the Dutch engineering firm Ballast-Nedam, the bridge was opened on 20 May 2000. It was built to replace ferry services, improving connectivity along the East-West Link and promoting economic development in eastern Suriname.

The bridge provides panoramic views of the river and the Paramaribo skyline, serving as both a functional and iconic infrastructure landmark.

Significance

The bridge is one of Suriname's major river crossings, alongside the Coppename Bridge, and plays a crucial role in facilitating transportation and commerce between the capital and surrounding districts. Its construction marked a significant advancement in the country's infrastructure, enhancing east-west travel efficiency and regional development.
