# The cable tray cover plate has fixing holes

## Overview

Splice plates are flat metal pieces with holes. We use them to join two tray sections end-to-end. The screw-on cable trays are available in perforated (MKS, SKS, DKS, EKS. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. The B-Line series Cable Tray Manual was produced by our technical staff. The following pages address the 2014 National Electrical Code® requirements for cable tray systems as well as design. The main cable tray connection methods include splice plates, bolted connections, quick connect systems, fish plates, clamps, and welding. Each method has different advantages depending on installation speed, load requirements, and flexibility.
