Trough-type cable trays and galvanized cable trays

Overview

Trough Type Galvanized Cable Tray is a fully enclosed cable management system, typically made of Q235 steel with hot-dip galvanized coating for corrosion resistance. Its rectangular trough shape with removable cover shields cables from dust, moisture, and electromagnetic interference. Widely used. We'll look at the main types of cable supports, what makes them different, and when to use each one. My goal is to help you pick the right solution for your electrical wiring needs. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. It has good effect on shielding interference of control cables and protection of cables in heavy. Clear cable routing – Organized and safe cable management, easy maintenance, helps prevent failures. Fast installation – Reduce installation costs with quick and efficient.
