West Asia Fiber Optic Channel

Overview

TRANSKZ is an award-winning terrestrial cable system providing a direct DWDM link between Europe and Asia. Developed by RETN, this 15,000km fibre route from Frankfurt to Hong Kong is one of the shortest on the market, offering a leading 143. This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time. Use the controls at the top to play the animation or step through year by year. For more details and insights, please read this. Also Read: A Time for Growth: The Expansion of Fiber Optic Use in Asia China's Massive Fiber Infrastructure Mainland China leads the way in fiber deployment, and boasted 59. 6 million kilometers of installed fiber lines at the end of 2022. Government-led broadband projects across markets in the Asia-Pacific region have reaped the fruits of success in recent years as optical fiber networks reach most households.
