Where can I get electrical distribution boxes made in Somalia

Overview

Our list for Electrical equipment suppliers in Somalia is one of the most comprehensive in the industry. As of March, 2026, we have compiled data on 13 verified listings.

Key Takeaways

Electrical distribution boxes in Somalia are designed, installed, and maintained by local companies such as Alnur Electrical Services and WESCO, providing both standard and industrial-grade solutions for power distribution.

Local Providers and Services

Alnur Electrical Services (AES), based in Mogadishu, offers comprehensive electrical services including the design and construction of distribution panels, installation of generators, and full power system solutions for industrial and commercial clients.

AE

S has experience with solar and wind energy systems, making them capable of integrating renewable energy into distribution networks.

WESC

© 2026 EXF OPTICAL NETWORKS - All rights reserved

O focuses on improving electricity reliability in Mogadishu and surrounding regions, supplying distribution lines, concrete poles, and distribution panels, including smart and digital units. They emphasize safe and standardized installations to mitigate risks in residential and commercial areas. Other companies like Deltec provide supply, installation, testing, and commissioning of electrical systems for industrial, commercial, and hospital structures.

Types of Distribution Boxes

Distribution boxes, also called distribution panels or switchboards, are used to safely distribute electrical power from transformers to end-users. They can include: Standard distribution panels for residential and commercial useIndustrial panels with higher capacity and safety featuresEX control panels for hazardous areas, with pushbutton units, signal lamps, and measurement instruments like voltmeters and ammeters These boxes can be prefabricated or custom-built depending on project requirements, and may include manual or automatic transfer switches and synchronizing panels for generator integration.

Construction Considerations

When constructing distribution boxes or substations in Somalia: Site selection should consider seismicity, flood risk, and proximity to sensitive populations. Substation design can be Air Insulated Switchgear (AIS) for outdoor installations or Gas Insulated Switchgear (GIS) for compact urban areas. Environmental and safety measures are critical to prevent hazards and ensure reliable operation.

Integration with local grid requires coordination with distribution companies like Beco and WESCO to ensure proper connectivity and voltage regulation.

Summary

For projects near Somalia, local expertise is available through companies like AES and WESCO, offering both standard and industrial electrical distribution solutions. Construction of distribution boxes involves careful planning, adherence to safety standards, and consideration of local environmental and grid conditions. Prefabricated or custom panels can be used depending on the scale and type of installation, ensuring reliable power distribution for residential, commercial, and industrial applications.
